Place the most narrow piece (back) just above the small of the back. If the patient is in the hospital bed, place the smear of the seat, then lift the bed to facilitate the positioning of the rear piece. 6 Place the slingshot bent under the patient so that the lower edge of the seat is slightly under the knees. 7 Bring the patient to the assistant. Pull the belt (how to place the traction sheet). 8 If the patient is in the chair, it can place the slingshot under the patient without lifting the patient following these few simple steps: tilt the patient forward forward and slide the part of the slingshot down to sit and lay the flaps of the legs Next to the patient's legs. Grab the leg of the leg on one side of the patient and, keeping the leg against the knee, pull it forward; Repeat with the other side of the ring. 9 The slingshot is not in the correct position. Bring the flap under a thigh and insert the ring (a) in the shot (a). Repeat for the other leg, inserting the ring (B) in the shot (B), thus enclosing a thigh in each leg of the leg. If you want to use the slingshot without containing the thighs, follow the instructions shown above but bring the ring (a) to shoot (B) and the ring (B) to shoot (a), with crossed flaps under the leg. It helps to lift the head of the bed after the slingshot is positioned if the patient is in a hospital bed. For Bracche/Lifts with chains fix the extremes of the chain with swivel bar hooks. It is possible to attach any ring of the chain in the swivel bar hook to adjust the height of the slingshot from the floor. Make sure the connections are the same on each side. Fasten the s hooks of the back in connections 1, 2 or 3, as required. Count the connections to make sure that there NON NON ossab otlon eratoccisse erolac o acces airA .odderf o odlac anhccan a eravaloIGGAVAL ID INOIZURTSI .etnematherroc itanoizisop onais S a icnag i enetac el ehc erallortnoC .enetac el erenet "Aup .advised is of es .enetac eli enretse eresse onoved etneizap led aiccarb el .elibissop e5 !ELOVERIG ARRAB E ELIDES ART ITNEMAGELLOC NI AM ANETAC ID AVISSECE ENOIZROP ANU NI ELANEIHCS OLLED S A ICNAG I ERANOZISOP NON .enetac ella itagelloc onais S a icnag i ehc illortnoC .tal ingo us oremun ossets of BLEACH. Do not wash with other colors. Remove the bars before washing. (Bars and coat hangers of two-piece harnesses shall not be removable. It is recommended to wash them by hand. This page shows some of the most popular harnesses<sup>1</sup>: Common harnesses Hoyer & Compatibility Table Sling Catalog See all harnesses: Back to How to Use a Lift Hoyer Lift Using a Lift Hoyer Lift Grade usage: You can measure the difficulty. Use of a Lift Sling with a Lift Patient Lift Sling from the type of Lift patient Lift the patient. It is not really a degree of difficulty, plus<sup>2</sup> of which may require caregiver patience. Some harnesses are easier<sup>3</sup> to use: There are different styles or types of patient lifters. U-shaped harnesses are the most effective<sup>4</sup> for transfers and toilets, but some patients may not be able to use a U-shaped harness and may require use full-body harness e. Easy à Patients who are able to sit down, even a little, are the best candidates for U harnesses. U harnesses are easiest<sup>5</sup> to use and the patient does not sit in harness once seated. Transfer to wheelchair, bed and dresser is easily done with au-shaped harness. Slide back support behind the patient Wrap the straps around the patient's leg Attach the straps to lift the lift. Lift the patient Process à We will not say it is more difficult to use a Full-Body harness, let's just say it takes longer<sup>6</sup>. It is a "process" that requires patience on the part of the caregiver. Place patient on one side Fold harness to half (longitudinally). Slide folded under the metA Body Roll the patient in the other direction Grab the bent part and drag it to the other side Roll the patient supine on the back Attach the sling to the crib Slowly lift the patient View all sling: Sling: Catalogue DETAIL FOR USE HOYER COMMON SLING AND PATIENT SLING LIFT 1. Arrange all the elements for a smooth transfer à lift, sling, wheelchair. 2.
